

HSBC ETFs PLC

HSBC ASIA PACIFIC EX JAPAN SUSTAINABLE EQUITY UCITS ETF

Marketing communication | Monthly report February 28 2025 | HSXJ LN | USD

Investment objective

The Fund aims to track as closely as possible the returns of the FTSE Asia Pacific ex Japan ESG Low Carbon Select Index (the Index). The Fund will invest in or gain exposure to shares of companies which make up the Index.

Investment strategy

The Index seeks to achieve a reduction in carbon emissions and fossil fuel reserves exposure, improvement of the FTSE Russell ESG rating and also applies the United Nations Global Compact exclusionary criteria. The Fund will be passively managed and will aim to invest in the shares of the companies in generally the same proportion as in the Index. However, there may be circumstances when it is not possible or practical for the Fund to invest in all constituents of the Index. The Fund can gain exposure by using other investments such as depositary receipts, derivatives or funds. The Fund may invest up to 35% in securities from a single issuer during exceptional market conditions. The Fund may invest up to 10% in funds and up to 15% in total return swaps and contracts for difference. See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.
- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.

Sustainability indicators	Fund	Broad market index
Carbon emissions intensity*	140.06	276.02
Fossil fuel reserves intensity**	1,495.94	3,602.05

*Carbon Intensity measures the quantity of carbon emission of a company (tonnes CO²e/USD million)
 Source of analytics: Trucost
 **Fossil Fuel Reserves Intensity describes the quantities of greenhouse gas emissions that could be generated if the proven and probable fossil fuel reserves owned by companies were realised and burned. (tonnes CO²e/USD million Market Cap)

FTSE ESG Score	ESG score	E	S	G
Fund	3.8	3.6	3.7	4.3
Broad market index	3.2	2.8	3.1	4.0

Provides a measure of a company's exposure to, and management of, ESG issues in multiple dimensions. The ESG Ratings are comprised of an overall Rating that breaks down into underlying Pillar and Thematic Exposures and Scores. A higher number indicates a more favourable ESG profile in the view of FTSE.

Risk disclosures

- To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.

Index disclaimer

The fund is a sub-fund of HSBC ETFs plc ("the Company"), an investment company with variable capital and segregated liability between sub-funds, incorporated in Ireland as a public limited company, and is authorised by the Central Bank of Ireland. The company is constituted as an umbrella fund, with segregated liability between sub-funds. Shares purchased on the secondary market cannot usually be sold directly back to the Company. Investors must buy and sell shares on the secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current Net Asset Value per share when buying shares and may receive less than the current Net Asset Value per Share when selling them. Affiliated companies of HSBC Global Asset Management (UK) Limited may make markets in HSBC ETFs plc. UK based investors are advised they may not be afforded some of the protections conveyed by the Financial Services and Markets Act (2000), (the Act). The Company is recognised in the UK by the Financial Conduct Authority under section 264 of the Act. The shares in the company have not been and will not be offered for sale or sold in the United States of America, its territories or possessions and all areas subject to its jurisdiction, or to United States Persons. All applications are made on the basis of the Prospectus, Key Investor Information Document (KIID), Supplementary Information Document (SID) and Fund supplement, and most recent annual and semi-annual reports, which can be obtained upon request free of charge from HSBC Asset Management; from a stockbroker or financial adviser or from our website (see below). Investors and potential investors should read and note the risk warnings in the prospectus, relevant KIID and Fund supplement (where available) and additionally, in the case of retail clients, the information contained in the supporting SID.

To help improve our service and in the interests of security we may record and/or monitor your communication with us. HSBC Global Asset Management (UK) Limited provides information to Institutions, Professional Advisers and their clients on the investment products and services of the HSBC Group.
